

## ULTRO Filter Systems Next generation modular filtration

From the global BWT group the revolutionary ULTRO Filter System provides premium filtration performance with unequalled flexibility.

Seven filtration options are available with the - one head many possibilities - convenience. Suitable for medium and low volume flow applications the BWT ULTRO is perfect for potable water applications at the point of use including drinking water, water coolers, coffee and beverages. The wide ULTRO range includes sediment only options, hollow fibre 0.2 ultra filtration and efficient Fibron activated carbon filtration in a range of micron ratings. Speak to the experienced BWT team for recommendations on the ULTRO filter most suitable. The Australian made ULTRO carries WaterMark certification for confidence in performance and quality.

**User Guides, technical support and installation schematics are available as required.**

### Features & Benefits

- Flexible modular system – media options to suit all applications
- One head many possibilities - The BWT besthead accepts all ULTRO cartridges and the large Water + More range
- Compact size and diameter to fit in small spaces
- Easy to install, use and change – positive o ring screw sealing
- Efficient Fibron filter media – long life high performance activated carbon block
- Hollow fibre Ultrafiltration 0.2 micron for bacteria, cyst and virus retention

### Application

- Drinking water systems – perfect for point of use
- Coffee / Beverages - ULTRO Fibron cartridges with scale inhibition
- Water Coolers – clean, clear dispensed water

### Specifications and operating conditions

- Flow Rate: < 10 lpm
- Capacity: 30,000 litres chlorine reduction for Fibron cartridges
- Water Pressure range: 80 – 860 kPa Use PLV if pressure is > 860 kPa
- Water Temperature range: 4 – 40 deg C
- Dimensions: Head, cartridge and mounting bracket - 12cm W x 26cm H Weight 1 kg
