COFFEE

BWT bestmin

Special filter system for water remineralisation downstream of reverse osmosis sytstems

BWT bestmin COFFEE is an innovative filter that is ideally matched to **BWT bestaqua reverse osmosis systems**. Reverse osmosis allows dissolved substances capable of leading to undesirable deposits – such as limescale and gypsum - to be removed from the water. The process thereby also eliminates chloride, protecting coffee machines from corrosion. Reverse osmosis thus produces an exceptionally pure water, albeit water that lacks something essential: minerals! They need to be added using the BWT bestmin COFFEE filter in order to perfect the brewing process and the sensory quality of the coffee.
In this filter, special mineral granules ensure **targeted remineralisation**, while colloids and bacteria (logó) are trapped and removed from the water in a membrane module (0,1 µm), enhancing the purity and microbiological integrity of the water.

Reverse osmosis systems in the BWT bestaqua range and BWT bestmin COFFEE for remineralisation are an **ideal combination**, marrying protection of the machine with the highest quality of coffee, regardless of the local water quality and even if using water with a high salt content. BWT bestmin COFFEE filters are food-safe and can be used downstream of any quality, and correctly configured reverse osmosis system and with any quality of drinking water worldwide.

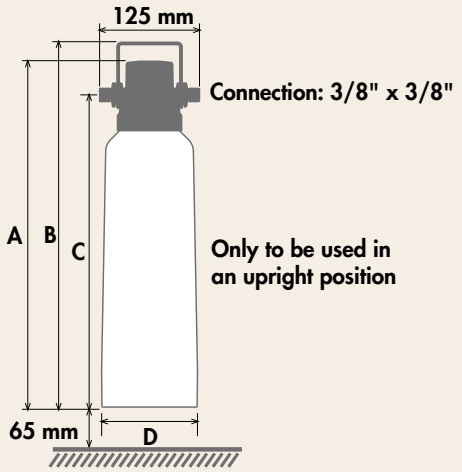
Technical data

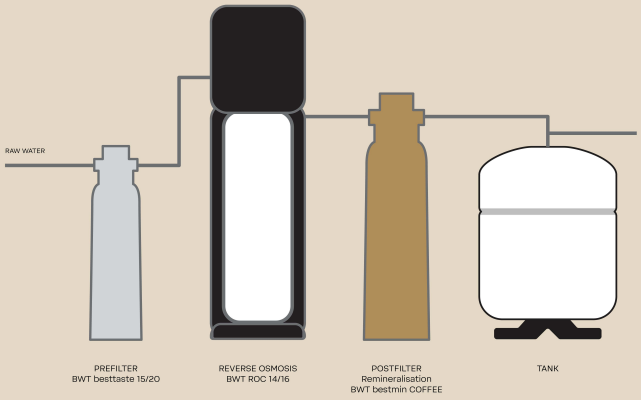
BWT bestmin COFFEE 100	
Typical capacity in litres	10,000
Height excluding handle (A) in mm	475
Height with handle (B) in mm	500
Connection height (C) in mm	425
Ø filter candle (D) in mm	130
Weight in kg (dry/wet)	4.0/4.5
Filter candle order no.	FS24M99A00



Operating conditions

Feed pressure: 2–8 bar
Water temperature: 4–30 °C
Ambient temperature: 4-40 °C

BWT bestaqua COFFEE - The complete system



BWT bestmin COFFEE – The mineral-giver

- For perfect remineralisation of water following reverse osmosis treatment
- Setting the mineral balance of Mg and Ca to an ideal ratio
- Neutral pH value for optimum coffee extraction
- With additional membrane filter stage for removing suspended solids (colloids) and microorganisms

Accessories

Description	Order number
BWT besthead FLEX	812420
BWT besthead ST	125252210
BWT bestflush ventilation and flushing valve	FS00Y51A00
