

# SnapLock

## Quick Change Water Filters

- Potable water applications; commercial, residential, water coolers, caravans, drinking water systems
- Sanitary design for hygienic filter handling
- Bayonet style; easy to use and changeout
- Compact, range of sizes to suit application
- Manual and auto shut off valve head options

Water Filter Services provide the wide range of easy to use SnapLock filter systems. SnapLock systems are available with media combinations to solve most water quality problems including sediment, chlorine, taste/ odour, parasitic cysts and lead.

SnapLock systems feature quick change sanitary design making the cartridge easy to change and eliminating the handling of

contaminated cartridges. SnapLock heads have a unique patented design featuring a simple quarter turn lock to guarantee correct sealing. Quick connect inlet/outlets are used for easy connection to tubing.

SnapLock heads are available in a range of configurations – please check with Water Filter Services.

### Specifications and Operating recommendations

Maximum Temperature – 37°C

Maximum Pressure – 900 kPa

Filter must be protected against freezing and direct sunlight.

Operate within pressure and temperature limits.

Carbon cartridges contain a small amount of carbon fines. Flush new cartridges for 2 minutes to remove fines and entrapped air.

Model	Claim	Capacity ltrs	Micron	Length mm
