

**in-line tank filter
for coffee machines!**
Available for almost all
brand name devices.

Optimal coffee water to fulfil even the highest requirements

Highest quality coffee water ensures optimal coffee enjoyment and protects high-quality machine technology.

The unique water optimization with bestcup professional technology offers targeted reduction of carbonate hardness (scale content) in the water and provides clear, particle-free coffee water free from unpleasant tastes or odours. bestcup technology ensures highly efficient protection against scale deposits in the coffee machine and improves the taste of espresso and coffee specialities.

Valuable minerals remain in the water and ensure optimal aroma and perfect crema.

bestcup professional technology offers all-round protection for your machine and guarantees optimal enjoyment for all coffee connoisseurs and espresso fans.

bestcup in-line tank filter

Compatible with a wide range of coffee machines, including JURA®, Lavazza®, Saeco®, ILLY® and many other brands.

bestcup fulfils the expectations of even the most discerning coffee connoisseurs and hobby baristas:

Protects your coffee machine from scale deposits
ensures long service life of high-quality coffee machine technology

Guarantees optimal and consistent coffee quality
perfect coffee aroma for satisfied coffee connoisseurs

Highest level of efficiency with large filter capacities
with professional 4-level filtration

Simple to use with no complicated setting procedure
for quick and easy filter change

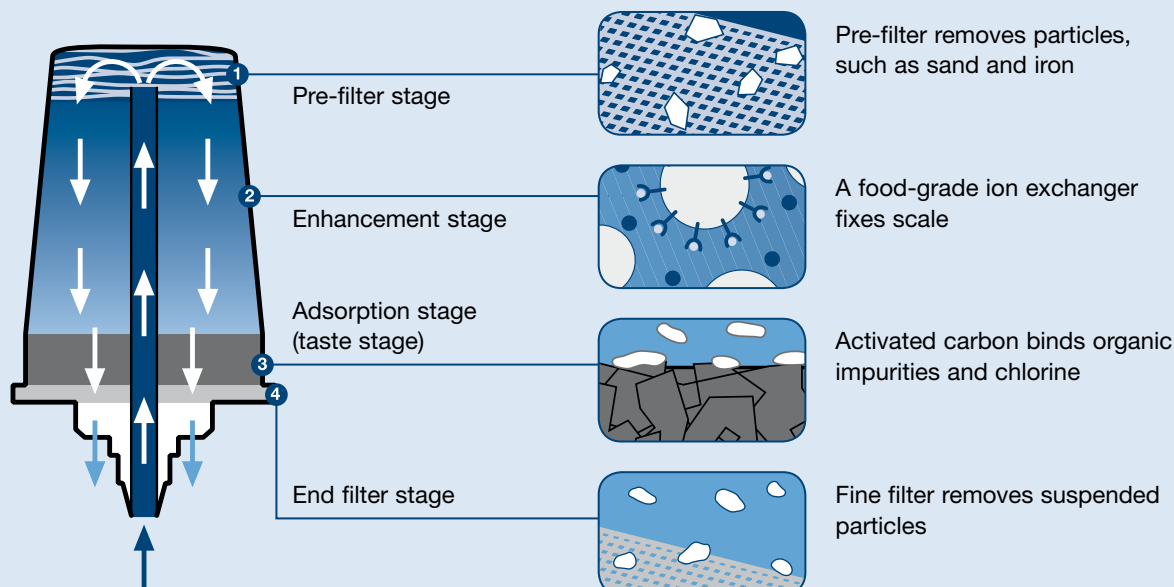

Simple use in the water tank

bestcup filter cartridges (1) can be used easily in the tanks of a wide range of coffee and espresso machine via an adapter (2).

A range of adapters are available e.g. for hose (3) or direct connection (4). The water is filtered directly as required (making coffee) and is available right away for your fresh coffee.

Ask your specialist dealer or visit
water-and-more.com for more information.
