

Pure Clean H2O Water Filters Twin Water Filter System

The PCH WSP2000 is a complete, economical twin water filter system utilizing 2 permanent filter housings with replaceable filter cartridges. The WSP2000 system has extra capacity and performance as 2 cartridges provide total protection and performance. The system is particularly suitable for high sediment applications. The twin filter has 2 stage filtration - Stage 1: The PS0510 replaceable filter cartridge reduces sediment, dirt, rust and particulate matter. Stage 2: The CB0110 replaceable filter cartridge reduces chlorine, unpleasant taste and odour, parasitic cysts whilst leaving in essential minerals and fluoride. All plumbing fittings are supplied including a dedicated drinking water tap. Clean, great tasting water can be enjoyed from your own water supply all year round!

Model WSP2000

Features & Benefits

- High capacity twin system for maximum performance and life
- Filter housings manufactured in U.S.A.
- WaterMark system - Australian Standards certified
- All plumbing fittings and components supplied – nothing to buy
