

## Water Filter Cartridge for Caravans

*Model: QC2513RV used in System SL1000RV*

The QC2513RV is the water filter replacement cartridge used in the SL1000RV filter system. The quick change filter provides great tasting particle free water by using a porous carbon block media for extra fine filtration. We recommend the filter is changed after 12 months of use or when the water flow slows significantly, whichever occurs first. Changing the filter cartridge is easy and instructions are provided.

Model: QC2513RV

### Features & Benefits

- Easy to use and change
- Reduces sediment, bad taste and odour
- Removes parasitic cysts from water
- Made in U.S.A.

### Application

- Low volume drinking water
- Caravans or Kitchen use
- Potable water only – not for use on non potable water or water of unknown quality

### Specifications and operating conditions

For Caravan use; If the water filter is not used for up to 4 weeks then a few liters of water should be flushed through the filter to drain before use. If the filter is not to be used for extended periods the existing filter cartridge should be removed, air dried for a week and stored in a dry location. To use the system again the filter cartridge should be re installed and 3 litres of water should be flushed to drain to purge air from the cartridge.

- Micron rating – 0.5 micron nominal
- Materials – All food grade. NSF compliant.
- Sediment, Chlorine, Taste, Odour reduction
- Parasitic cyst removal
- Flow rate: < 3 lpm
- Water pressure: 200 kPa – 700 kPa suitable
- Temperature: up to 40 deg C (cold water use only)
- Dimensions: 63mm dia x 250mm long
