

bestaqua HQ Water Treatment System

From Europe's largest water treatment company BWT, the bestaqua HQ Water Treatment system is the total solution for your food service equipment including dishwashers, steamer ovens and coffee machines. The system is a multi-stage treatment process:

- 1) Pre-filtration with a fibron carbon filter to remove sediment and chlorine.
- 2) bestaqua Reverse Osmosis to reduce all dissolved solids including scale and hardness ions.

An optional stage) - Remineralisation to add minerals for full coffee flavour.

bestaqua 60HQ models are available for larger dishwashing applications up to 400 lph. A storage tank and fittings kit with all connectors, hoses and tubing is standard. User Guides, technical support and installation schematics available as required.

Features & Benefits

- Compact complete system: easy to use.
- LCD panel - for setting and monitoring key parameters
- Integral pump to provide water pressure required.
- Manufactured in Europe; dependable quality and performance validation
- High flow rates and capacity. Range of models available to suit all applications

Application

- Dishwashers - Polish Free glasses
- Coffee Machines - Equipment protection and optimum coffee flavour profile
- Steamer Ovens - Scale prevention and protection from corrosion
- Food Service use - for all potable water applications
