

BA14/16 ROC Mounting Bracket Instructions

Step 1.

The ROC mounting bracket can be fitted in 4 ways. On either side of the ROC and with the bracket in either of 2 directions.

Decide which orientation is best suited for your installation.

The ROC14 weighs 13 kg, the ROC16 weighs 18 kg. Ensure fixings secure the ROC weight and vibration.

Note Depending on site installation it may be easier to mount the bracket to the wall first then fit the ROC to the fitted bracket

Step 2.

Use the bracket as a template to mark the fixing holes. Keyway slots are provided. Install mounting bolts into the wall.

Step 3.

Remove the existing 4 allen screws from the underside plate of the ROC.

Step 4.

Fit the mounting bracket to the underside plate with the 20mm allen screws supplied with the bracket.

Step 5.

Align the keyway slots of the ROC bracket to the mounting bolts in the wall. Secure tightly the ROC bracket.

Bracket Code: BT71C4 incl 4 housing mounting screws
