

Filtered Water Taps

BWT Australia provide a range of taps for drinking water systems. These taps are designed to flow at < 5 lpm and for use with a water filter – not for use as main kitchen tap. The taps are available in different styles and dimensions are included. Check with supplier if installing into a stone/granite bench top.

Height dimension = From the top of the spout to the bottom of the base mount (excluding the threaded stem)

Width dimension = from the end of the spout to the centre line of the base.

FCT-1 Black lever

Height: 220mm
